IRRIGATION USAGE:

As a water conserving measure, New Kent Public Utilities has design goal of 10 gallons per minute & 150 gallons per day for residential irrigation systems. This is more than adequate for most lawns, and need not run every day to keep a lawn healthy. In subdivisions where irrigation meters have been pre-approved, customer should contact DPU either in person or by phone to obtain information about getting an irrigation meter installed. Irrigation meter fees range from \$300 to \$1,000 depending on location. It is the customer's responsibility to connect their irrigation system to the County supplied meter. Regular water rates are charged for irrigation usage. However, when the irrigation meter is installed sewer charges are not billed on the water used for irrigation. In subdivisions where irrigation meters are not available, regular sewer usage fees are charged on all water used.

New Kent Public Utilities does not adjust water accounts because of over excessive use of irrigation without a separate irrigation meter.
